### PROFILE

Full-Stack Developer with strong foundations in **front-end (React, Next.js, Tailwind)** and **back-end (Python, Django, Flask, FastAPI)**. Built 30+ web projects during a 34-week immersive bootcamp and self-learning — from static websites to full-stack apps and AI-powered solutions. Fast learner, deliver-oriented, multilingual (FR/EN/NL).

### KEY PROJECTS

#### AI Image Generator (DevChallenges) — Next.js, Supabase/PostgreSQL, Hugging Face

Built a full-stack AI image generator with Hugging Face API and Supabase (auth & storage), enabling user-prompted image creation with persistent results.

#### Royella Hotel Management (Capstone) — React, Django, MySQL

Developed a hotel management system (React, Django, MySQL) with booking engine (search & filter), client records, and automated contact forms. Delivered under deadline as final project.
